## Town Council.

Two More Building Permits Applied for.  
Adoption of Gas Schedule.

The following were present at the regular meeting of the Town Council held on Thursday last: Mayor Robertson, Councillors Brown, Reid, Smith, Cotton and Beattie. Solicitor Lyons was also present.

The following accounts were read: F. Lugelsday, repairs, 2.50  
S. A. Hardware Co., sundries, 18.00  
G. Redell, gas pipe, 18.00  
Newman & Co., sundries, 1.50  
Bow Island Review, printing, 22.50  
F. Fornitz, labor, 1.00  
S. H. Haug, labor, 6.00  
J. Laynik, labor, 3.00

These were ordered paid if found correct.

The Southern Alberta Hardware Co. applied for permission to erect building 25 x 75 and 10 x 50 on lots 11 and 12, block 13. This was granted on condition that the buildings were erected in accordance with the Building by-law.

Like permission was also given W. J. Oliver for a building on lot 6, block 13.

The secretary-treasurer stated it would be necessary to borrow the sum of \$300 to meet current expenditures, and Mayor and Secretary were given the necessary authorization.

A new gas schedule, recently compiled by Councillor Brown and adopted by the Council, was now introduced in the form of a by-law, in which the gas rate was given as follows:—

For the first 100,000 feet consumed per month, 20¢ per 1000.  
100,000 to 200,000 feet, 15¢.  
200,000 to 300,000 feet, 12¢.  
300,000 to 500,000 feet, 10¢.  
500,000 to 750,000 feet, 5¢.

After having given its third reading, the by-law was adopted, the Council agreeing that it be in force from their next meeting.

The matter of extending the gas main south of the track was then discussed, and the town solicitor was requested to endeavour to obtain permission by leasehold or otherwise, for the laying of gas main on strip of land south of the elevation from the Dominion Government, also to take up the matter of obtaining possession of this strip of land for the town by lease or otherwise.

The Mayor then appointed Councillor Brown as his deputy for the next three months, after which the Council adjourned.

Bow Island's agricultural fair will be held on October 19th.

## Consolidation at Burdett.

Undismayed by the failure met with in its preliminary move for a consolidated school district, Burdett has never lost sight of its objective, and in taking up the matter with renewed vigour the Trustees of the school were convinced that when its advantages were better understood and recognized, consolidation would be treated in an altogether different spirit. This proved to be the case, and after being taken up with the Department of Education, word has been received that apparently everything is in order and an inspector would be sent down within the next few days to make the final arrangements. The school trustees, viz., Messrs. W. M. Robertson, A. Hamilton and E. B. McCullum, have, it is understood, wisely decided not to undertake the building of a new school just at present, but probably with the provision of one of the new schools they will make the present accommodation suffice for a time.

Geo. Thacker, of 24-10 1/2, off summer-fallow, has secured a crop of 44 bushels to the acre.

Mr. and Mrs. E. B. Collins of Le-Mars, Ohio, arrived this week on a visit to their daughter, Mrs. W. M. Robertson.

Messrs. Elford, Marine and Peterson unloaded on Wednesday a 15-20 international engine and separator, which they had purchased through K. Brown the local agent.

Geo. Cropley has got the contract for putting up a building at Bow Island for Louis Shon. The structure will be a two-story affair, and will measure 24 x 32. There will also be an addition 16 x 24. The work, we understand, will commence immediately.

Many in this district are unaware of the regulations governing bird help in connection with the shooting of game. Under section 18 of the Game Act, bird help is not considered a member of a farmer's family. In many cases farm help consists of persons who have come here temporarily from other provinces. Such persons require a non-resident's bird game license costing \$2.00.

Mr. and Mrs. M. A. Handle returned this week from an extensive trip through parts of British Columbia and Montana, during which several days were spent in visiting Glacier Park. Mark says one of the most interesting incidents of his trip occurred when they were threading their way through the park, and a great black bear suddenly obstructed their path. Not being able to shoot the animal, he did the next best thing, and took a snapshot.

## Don't Cough Your Throat Sore, Don't Suffer, USE "Nerviline," It Will Cure You Quickly

### The Annoyance of a Bad Cough Soothed Away in One Day

Nothing so bad for the throat as coughing, and nothing half so annoying as to have someone near you who is hacking, sneezing, or coughing constantly during the throat.

Rob on Nerviline

"It will kill you and destroy all further pain by this soothing, penetrating remedy will bring the finest relief, will take out that rasping, seariness, will stop that irritating tickle that makes you want to cough so much.

Nerviline just something new. I have a record of forty years of wonderful success behind it.

#### NERVILINE

In rubbing on Nerviline, you get something safe, reliable and sure to cure. Its action is marvellous. The way it penetrates to the seat of the irritation is really wonderful.

For chronic colds, coughs, or sore throat you can't beat this trusty old remedy. It really cures the throat, and the pain in the joints.

It will cure you for rheumatism, test it on for bed-ridden or lambo, in every case for neuralgia or headache.

Most families keep the large 50c bottle always handy on the shelf; trial size 25c, at all dealers in medicine, or the Cattermole Co., Ltd., Toronto, Canada.

## Women As Inventors - Many Notable Inventions Are the Result of Ingenuity of Women

Women are generally considered lacking in inventive ability. The truth is that they have been inventing since the dawn of time. It is not that they are less inventive than men, but that their inventions are less numerous. As a result of this, the world has progressed as a result of many inventions made by women.

How few women ever realize the value of their own ingenuity. It was a Scotch woman, Christiana B. Parsons, who first invented the sewing machine. It was a woman, Margaretta Knight, who first invented the paper bag. It was a woman, Maria Theresia, who first invented the paper bag.

Silk weaving was invented by the wife of the fourth Emperor of China, in the dim ages of antiquity; a woman in the harem of an Indian prince invented the weaving of cashmere shawls; the same clever woman, or her mother (authorities differ on the point) discovered silk of roses; the first Italian, who covered the secret of Venetian paint, which had been lost for nearly 600 years, was a woman.

## THE BIRTH OF A NATION

### A Thrilling Drama Shown in Motion Pictures

The unqualified success attending the production of Dr. W. Griffith's famous "Birth of a Nation," has attracted the attention of C. B. Walker, of Winnipeg, to again secure the attraction for his western theatre, and the highest spectacle, the eighth wonder of the world, will make the organization of the Walker, Winnipeg, for the three days, daily matinees, commencing Thursday, September 28.

This will be the third visit (the first having already been presented four weeks in Winnipeg), and the little crowd capacity here will again be the order. After playing Manitoba again, the company goes to the Orpheum Theatre, Brandon, for the entire week commencing Monday, October 2nd, where two more performances will be offered. Return to the next city, Regina, where two shows daily, commencing Wednesday, October 10th, and Thursday, October 11th, will be presented.

For three days, commencing Thursday, October 11th, the Empire Theatre, Saskatoon, will be played. Arrangements are being made to run special trains from the small towns and villages into Winnipeg, Brandon, Regina and Saskatoon, and there is little doubt that many will avail themselves of the opportunity to see the greatest photoplay the world has ever seen or is likely to see for many a day.

"The Birth of a Nation," as presented in the above towns will be exactly the same as the one now playing the Mayway Hall, Toronto, and the fifth week and comprises not only 12000 feet of film, but also a sixty-foot cut of scenic sound and lighting effects, and last, but by no means least, will be presented the excellent symphony orchestra of not less than twenty-five carefully selected musicians.

### Minard's Liniment Cures Burns, Etc.

A Family Talk

"See here, Jones, you've had that telephone receiver at your ear for ten minutes and haven't uttered a word."

"Sh! I'm having a typical conversation with my wife."

To safeguard the child from danger that worms cause, see Miller's Worm Powder, the medicine par excellence for children. These worms will clear the system entirely, and the worms will be removed and the organs indolently affected by the operation of the digestive processes. As a vermifuge it cannot be surpassed in effectiveness.

United States is now exporting \$75,000,000 worth of sugar yearly. Before the war the United States export was valued at about \$5,000,000.

500,000 Germans Disabled at Verdun

Competent authorities estimate that about 500,000 Germans have been disabled in the Verdun region since February 21, the beginning of the great German offensive in the west.

The total number of wounded German prisoners taken in the Verdun sector and in the neighborhood of the Somme exceeds 450,000.

Job-sacker (entering office unannounced): Is there anything here for me?

Chief Clerk: Yes, sir, right behind you.

It makes other food sourish

Borri makes other foods sourish

W. N. U. 1124

## The Revolt of Brussels

### Germans Trying to Drive Belgians to Last Stage of Desperation

Report that the city of Brussels has refused to accept a flag of truce, the lion marks, imposed by the Germans as a penalty for the patriotic demonstration which marked the observance of Belgium's national day, July 21, is likely soon to be followed by news of staggering intensity in the west.

Brussels is under the German heel since the day of the armistice. To attempt to squeeze more millions out of the people of the Belgium capital, because of its inevitable show of patriotism on such an occasion, is the most monstrous. But even at that, the explanation is probably only trumped-up.

The German military authorities have heretofore given plain evidence of a purpose and purpose to drive the Belgians to the last stage of desperation. The result of the municipality of Brussels at this latest imposition indicates that the stage has been reached.

But if the people of Brussels refuse to carry out what next? Made a matter of course, and that all arranged, and we may be sure that the programme is a sinister one.

They would hardly have permitted the city without preparation against the possibility that they might be refused—such is efficiency.

But they expected, they expected, as well as planned for it, or actually sought, by the enormity of the last move, to drive the city to revolt.

They have planned for a series of fresh spectacles illustrating the German capacity for following up an ingenuously attack on human rights by another ingenuously move, but no human rights.

They have ravaged the Belgian harvests for their own use. They have driven off the herds for meat and hides and carcasses for their own use. They have deported men, women and children to Germany. They have taken millions of marks from the Belgians to supply their own enormous military machine.

The Germans in Belgium are not doing it. They are not in the least. The last chapter of the German policy in Belgium is the suffer is yet to be written.

The world will await, with fresh interest, the next chapter of the German policy in Belgium. The world will await, with fresh interest, the next chapter of the German policy in Belgium.

A Scriptural Where

Young minister found himself in charge of a congregation in which many young women. In desperation he secured a transfer to another church. A few months later he meets a young woman.

"How are you getting along?"

"Well, the women aren't. They are a bit 'tender'."

"And I find safety in numbers."

"Good, brother, I found safety in numbers."

Minard's Liniment Cures Dandruff.

## High Cost of Living

### The Staff of Life and Its Upward Tendency These Days

The high price of wheat causes an ominous significance to the housewife. A grocer predicted a few days ago that before spring brands of flour costing \$6.50 a barrel formerly sold for \$6.00 or more. This will be less than the record price of about \$10.00 for these grades last year. But the advance will come closer home to working people than any other increase of prices.

In spite of present prosperity there are still large sections of our population for whom bread is the question of subsistence. To great numbers of recent immigrants the most prohibited luxury. They may pick up a few crumbs or other things, but for the most part they are poor.

A well-seasoned soup has a surprising effect on the stomach. It provides some flavor and makes a meal seem more substantial than it really is. With this added, a few new comers to this country will find for days of the day, but baked after the foreign manner.

What a feast, of course, is found in the most substantial character. People of indolent life and finicky appetites would not eat enough of it for full nourishment. The manual laborer, however, who is fatigued by his work, is able to eat it without trouble.

The present high wheat prices will again encourage the farmer to stuff every possible acre with the staple grain. The farmer who is in need of help. But the wastes of French life are enormous, and the Canadian workman will pay a high price for his bread while the war lasts.

It has certainly been a great year for the back-yard garden. The square foot plot into potatoes will go far to reduce the flour bill and provide a nourishing substitute.

### Stefansson Plans to Discover Extent of the New Northwest

A letter has been received by G. J. Desbarats, deputy minister of navigation, from Dr. Stefansson, of the Stefansson northern expedition, who some time reached Nome.

The letter states that Stefansson's plan had been to make a northerly circuit around the new land, and was expected to reach this point this summer and form a winter base there.

As a result of the fact that his ship did not succeed in getting far north in 1915, however, and of trouble with his dogs, the expedition was unable to carry out his design. He had reached his new land May 1st, but it was understood that he will winter at Winter Harbor, on Melville Island. The schooner, "Felix," one of the vessels of the expedition, was expected to reach this point this summer and form a winter base there.

Ken Chipman, one of the members of the southern party who travelled to Edmonton by the overland route, is not going to Nome with the expedition. His companions, who reached Ottawa and is preparing his report to the Geological Survey Department.

Chipman, who was accompanied with the expedition, travelled south by way of the Mackenzie and Athabasca rivers.

## Advice to Clergymen

Why don't clergymen who are unreluctant to give counsel to their flock for themselves (and in the nature of things there must be a good many of them) occasionally read out of the beautiful homilies provided for them by the church? Or why don't they frankly read someone else's sermon, and then give credit to the author, instead of cribbing passages and spoiling them in the conveyance? One wonders whether the sermon which exists nowadays—the man who, in the nineteenth century, was a "loose" original, sermon in manner, but a transfer to a modern style, that Coleridge, when he was particularly hard, raised the wind in his words. How much would a sermon in Coleridge's handwriting fetch today?—London Chronicle.

# WIFE HELPS THE SOLDIER-FARMER TO SUCCEED

The Government is Making a Special Monetary Allowance in Addition to the Pension, for the Maintenance of Both the Soldier and His Family, while he is Receiving Elementary Training

"What makes you think you'll succeed as a farmer?" The question was asked of a returned soldier who had expressed a very strong desire to get on the land.

"My wife," he answered.

"Do you mean to say she persuaded you?"

"No, I didn't need any persuading. But she won't let me do as much as I do."

"Does she understand what it means?"

"She ought. She was born and brought up on a farm she is not afraid of hard work, and she never tired in the country away."

"For the children's sake?"

"We've got some, worse luck. No, she likes it better herself."

"That man's half a woman."

"He was not a farm boy himself, and he does not know what it means to be a farmer."

"The light experience he possesses is enough. He is there to see the value of the elementary training, in matters as gardening and poultry raising, already given."

"Military Hospitals Commission at the University of Toronto, and he aims at taking a course of extra instruction here at one of the agricultural schools."

"As announced some time ago, the Government makes special monetary allowances, in addition to the pension, for the maintenance of both the soldier and his family while he is receiving elementary training."

"In matters as gardening and poultry raising, already given."

"Military Hospitals Commission at the University of Toronto, and he aims at taking a course of extra instruction here at one of the agricultural schools."

## How Britain Cares For Her Soldiers

Former French Minister Loud in Praise of British System

Adolphe Brisson, formerly a French minister, has returned to Paris from a visit to the British Isles. He gives a very vivid and interesting description of how a great army is administered in the field.

"Of special importance is the manner in which the British soldier is cared for."

"We are all generals who are not only warriors, said M. Brisson, but who are great administrators, trained in the staff, and able to plan the details of a campaign."

"In establishing the base of a long military action."

"I admire their calm confidence in the sovereign power of Great Britain. Always they made the same statement."

"The English need time to understand. We did not know war like they did. It had to be learned. We are slow to learn."

"In the English need time to understand. We did not know war like they did. It had to be learned. We are slow to learn."

## Bukovina Duchy a Place But Little Known

Sandwiched in Between Galicia and the Northwestern Frontier of Rumania

When the present writer first visited Bukovina, a young American, whose high-spirited character, lively personality, greeted him on board a Danube steamer. His question was: "Have you ever heard of a place called Bukovina?"

"No," he answered. "I am a correspondent of the London Times."

"I suppressed," he said, "and this piece of knowledge, much to my regret, I heard of it at all. The traveller, however, had been studying European politics and selecting his route to a far-flung manner with a view to becoming an authority not upon past but upon future history. Someone in Paris told him about the Bukovina. He was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

"I was now on his way to it," he said. "I was now on his way to it."

## Small Grain Exhibits

The Influence for Better Crops Resulting from Farm Activities

The use of better seed offers one of the most effective methods for increasing the yield of farm crops.

The work of seed improvement associations and individuals who carefully select their own seed, has resulted in the general use of better seed. This selection in practice is displaying crop products of high quality and exceptional yield.

Other influence which should have an effect on the quality of the seed planted. The influence of the seed is not limited to the quality of the seed itself, but also to the quality of the soil in which it is planted.

The influence of the seed is not limited to the quality of the seed itself, but also to the quality of the soil in which it is planted.

Thanksgiving Day, which will be observed in Canada this year on Monday, Oct. 9, was originally intended to be a religious festival. It is an ancient institution in the United States, having been begun by the early settlers who were accustomed to assemble once a year to give thanks to the Almighty for a good harvest.

It received almost an established legal status during the Civil War, when President Lincoln annually proclaimed a special day of thanksgiving and prayer. His example was followed by the governors of all the different states. Since that time it has become a fixture in the calendar but its character has changed gradually, the religious element becoming more and more attenuated until it has almost disappeared. Thanksgiving Day, as celebrated by our southern neighbors, is now hardly distinguishable from an ordinary secular holiday.

In Canada its history has been much the same. We imported it from the States and for a considerable period of years we celebrated it on the same date in November as they do. But by and by when it had largely lost its religious significance we decided to move it back a few weeks because our November weather is not well fitted for outdoor amusements. At the same time we changed it to Monday in order to obtain the advantage of having two non-working days together. This arrangement has pretty well destroyed whatever religious significance it had previously retained.

This year, however, the circumstances are unusual. Our people are in serious mood owing to the sacrifices caused by the war and the bereavement it has brought to so many families. This fact is being recognized in the proclamation published in this week's official Alberta Gazette. The suggestion that the religious aspect of the day should be emphasized is one that ought to appeal to a Christian community. We have many blessings to be thankful for, not least of them being the preservation of our lives and liberty from Teutonic foes. Would it not be possible for everyone, here in towns at least, to offer up thanks for our bountiful harvest and silently pray for those from this district who are now on their way to the front, whilst not forgetting the men who are actively engaged in peace.

**Notes by the Way**

By "MINIMUS."

Thanksgiving Day has come round again. Well, and what about it? The man who has threshed out life is going to be congratulated. Probably too he deserves it. He has worked for it in cold and heat and by the sweat of his brow he has done it. But now comes Thanksgiving Day. Somebody's got to be thanked. Whom? The hired man? No. This is not a Christian country—yet. Bits of it are. Some of the best men are. But it is not won for that cause yet. Were it thoroughly Christian there would have been no necessity for Prohibition. The v would have been no need to substitute for the Law which can be broken the laws which cannot.

But although we are not all outspoken Christians we are largely loyal to the Law. We know that on Thanksgiving Day we don't drink the hired man but someone else. A Harvest Supper is quite inadequate. There must be private (or better in public) be a giving of thanks. Not just this only once.

There was great stress in the Jewish custom of bringing in the first fruits to be offered. And they did it publicly. They were not ashamed of it.

We in S. Alberta have every reason to be thankful. And merely feeling thankful is not much good. Good feelings if not put into action merely waste. And so there will be a putting of God into action and a putting of hands into pockets. And the men who have extravagance picking their consciences (those who still have consciences), because they have bought an auto, will for once use that auto for going to the appointed places to give thanks.

You see when things go wrong we are apt to whine. Why did God allow this or that? Why does God allow this or that? Having given some food, he would not stop this war any more than he stops one man from getting drunk, or 50 men or 5,000,000 men fighting. This war is not a revelation of God's dealings with man but the result of men's dealings without God.

Well then, things here have gone right. What are we going to do about it? Seriously, is a Chicken Supper adequate to express what you feel? Of course it isn't. But you never really thought of it seriously before. If things were as they should be the preachers would not be able to get inside their churches on the Feast of St. Pumpkin, as the vulgar call it. And just because people had nothing to say one simple dogma—God tries GIVER.

**Peace River Country**

The Department of the Interior, at Ottawa, has just issued—through its Railway Lands Branch—a very comprehensive pamphlet dealing with that new Mecca of the landseeker, the Peace River Country.

While a few pioneer settlers have from time to time penetrated this portion of Northern Canada, it has only been within the past few years that it has been possible to reach the great Peace River Valley as within the reach of the homemaker. The almost insuperable difficulty in taking in supplies and machinery, and the corresponding task of marketing the crop rendered this fertile area of Canada's hinterland a veritable terra incognita.

While it has been said—but few have explored this district, many have been surprised to learn that so long ago as 1878, grain from the Peace River captured the trophy in competition with the world at the Centennial Exposition in Philadelphia.

This publication deals with all the subjects which naturally suggest themselves to the average inquirer. Under the headings of Agriculture, Timber, Minerals, Game, and Transportation, the pamphlet gives a mass of information. Climate and rainfall are also treated. Numerous extracts are given from the reports of well known explorers and scientists who have visited the country, dating from the beginning of the last century, down to the present day. There is a consensus of opinion among these authorities as to the adaptability of the country to the growth of all grains and root crops. The great amount of sunshine which obtains in these northern latitudes renders vegetation both rapid and luxuriant.

In the Peace River district the seasons change very quickly, so that as soon as the snow passes the ground is ready for sowing. The soil in some places, consists of a rich black loam. In others it varies from a blue clay with a top soil of sandy loam—from two to six inches—to a sandy loam much desired by wheat growers.

Vegetables attain a large size. During part of the winter season cattle and horses may winter outside.

It is a country abounding both in mixed farming and ranching.

This useful publication is being distributed free of charge by the Railway Lands Branch, Department of the Interior, Ottawa.

Along the part of many sportsmen as to whether Hungarian pheasant are protected or not.

"As the season for prairie chicken, partridge and Hungarian partridge opens on the 2nd of October the first being Sunday, you are at liberty to shoot chicken and Hungarian pheasant are not to be shot at any time. The season for prairie chicken, partridge and Hungarian partridge extends during October and November. On prairie chicken and partridge the bag limits to birds, per day or 100 birds for the season (not ten of each species, but a total of 10 of the family to which they belong). The limit on Hungarian partridge is five birds per day or 50 for the season."

## Hun Prepares For Siege

The All-Round Pressure That Will Be Exerted With Increasing Intensity

John L. Garvin, editor of the London Observer, believes that the German war caste will struggle for the better part of a year, but he will try to compel the Kaiser's people to fight to the last gasp, yielding to indispensable terms. That is a policy more easily said than done, for the United Nations to execute in the circumstances of next spring and summer.

Delisted there will be an extensive German retreat in the east, but before that occurred the Germans have served a useful purpose. The harvest will be gathered in. With little regard to the local inhabitants or to natural rights of any kind, grain and stock will be shipped into Germany so as to provision that empire to stand siege for another six or eight months. German boys will be called upon.

In this way, the weapon factories in full blast, the enemy rightly expects to keep a good many of its spite of all, and to effect prodigies in the way of turning out equipment during the winter.

General Joffre has explained to an American interviewer that at this moment his in the field, equipped army of millions of men, and never will of course have an artillery more than proportionately greater. When the Germans are filled on a shorter line, the reader will agree that the result would be a vain thing when they contemplated the elimination of France.

Moreover, the French have the French man to break the Germans if they have to move. The French wheel to wheel from the North Sea to the Atlantic. The French have to hand, will be twice as redoubtable as they have been yet. Russia in six months will face the German army, at least an equal of heavy battering power added to the German army.

It is why Mr. Garvin says the Allies' general offensive is but a prelude at present, by comparison with the all-round pressure that will be exerted with increasing intensity from now to next spring. The Allies can wear down any possible German counter-attack as a routine. They can then cross forward on converging lines, and they are determined to cross the German settlement on German soil.

Germany, by its arrogance and arrogance, has herself created what otherwise could by no possibility have existed. The German army of all recorded alliances with a combined military power that will be used to a certain point will be re-motivated. The German army, and unwittingly called to big battle by Teutonic Frankenstein. He will make himself effective, and save himself from being destroyed by his own creation, but the intensity will be out of all.

### Language of the Britons

Many Words Have Been Borrowed, But the Basis Is Anglo-Saxon

The people living in what is now known as England, Scotland, and Caer and his Roman soldiers crossed the Channel from Gaul (now France), belonged to a race of people who overran a great part of Western Europe. The Gauls, who occupied France at the time of the Conquest by Caesar, adopted the language of the Britons, and were closely related to the ancient Britons. Anglo-Saxon, the language of the Britons was Celtic, different tribes speaking different dialects. Gaelic spoken in the Highlands of Scotland is a Celtic language. The foundation of the English language was the language brought to the island by the English, and other tribes, who came from the east and west. They were of Teutonic stock, but belonged to a branch of the family widely different from that which occupied the southern shores of the Baltic. We commonly speak of the language of those invaders as Anglo-Saxon. An Englishman today, with an ordinary education, would not be able to read or understand it. If spoken it was the speech of England when the Normans came in 1066 and brought the French language to England for the official language of England for several generations, although Saxon or Old English, the language of the people, remained the language of the people. The English language, as we know it, is a mixture of the Old English developed into Middle English, and the French, and the latter developed into Modern English as spoken and written today.

It has taken many centuries, the French, and, through the French, from the Latin, and the Greek, and many words from the Greek, especially words applying to science. But the basis is Anglo-Saxon.

It was seen hobbling down a flight of steps, shamed and torn to shreds. Barely enough was he able to get up the stairs. It was a pitiable sight. So curiously was aroused. "What are you?" he asked. "How came you in such horrible condition?" "I am a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

"You are a man who has been wrecked," he replied. "And I have just been released from a female brigand who preyed."

### A Pioneer Missionary

George Young, Missionary and Pathfinder in Red River Settlement

An aged resident of a Red River locality to the northward of Winnipeg, Canada, has been called to the writer.

George Young arrived in the colony. The next Sunday he preached in a log building near the Great Company's store in Fort Garry.

Days of long, long days brought into memory.

Young, missionary and explorer, had been the pioneer of the Red River in 1868. The advent of George Young was looked for eagerly, both by the people of a man who would have over the prairie the entire of a pioneer.

At the period of Young's arrival, the colony was in the throes of discontent. A government had been assembled; nevertheless, dissatisfaction and strife pervaded the atmosphere.

George Young was a man of peace, a future of his labors in Manitoba not perpetually in horse sale, by hire of companies. He cast a quiet influence, scattered seeds of righteousness among the people.

For thirty years previous to Young's heroic work in Manitoba, he had been a Methodist minister in the north.

In 1848, missionaries of the Methodist Church were instrumental in the work of the Red River. Young was a pioneer of the Red River in 1868.

At the time of Young's arrival, the colony was in the throes of discontent. A government had been assembled; nevertheless, dissatisfaction and strife pervaded the atmosphere.

### Rumania In History

Her Place in European History Has Always Been an Honorable One

Though Rumania up to the nineteenth century, she has always been played a conspicuous part in the advance of civilization, she is a little less than a century ago, she was one of her neighbors, her achievements have proved of supreme value.

By their stubborn resistance to the sway of the Turks, they, the Rumanians, by their determined hand, it weakened the power of the Moslem invaders, that they were unable to carry on the fight.

Rovovo is a name sacred to all the Balkan nations that related Turkish rule. The Prince of Wallachia, the late of his labors in Romania not perpetually in horse sale, by hire of companies.

For thirty years previous to Young's heroic work in Manitoba, he had been a Methodist minister in the north.

In 1848, missionaries of the Methodist Church were instrumental in the work of the Red River. Young was a pioneer of the Red River in 1868.

### Starving Syria

Christian Natives Have Been Bitterly Persecuted Since the War Began

This year marks the 400th anniversary of the conquest of the Syrian Empire by the Persians. The inhabitants are fairly not in a mood for celebrating that event. Hard as they were their lot before the entrance of Turkey into the Syrian Empire, they are now called upon to face conditions a hundred-fold worse.

Nearly all of the able-bodied men have been forced into the Turkish army, where their lot is a life of hardship and death. They are given only small quantities of food. The Christian natives of Syria have been bitterly persecuted since the war began.

The typhus epidemic of the last few months has also added to the horrors of Syrian life. The Turkish army, where their lot is a life of hardship and death. They are given only small quantities of food.

### Train Animals To Accomplish Strange Jobs

Intelligent Animals Trained to Perform Many Services

Many strange and unexpected cases are on record in which animals and birds have proved themselves of great value to mankind, very often serving their masters more devotedly than many human beings would do under similar conditions, says America.

At times of stress like the present such dumb servants have proved themselves particularly useful, a good instance in point being provided by the case of a resident in the West of England, who recently lost his gardener through the war. His master was confronted by the problem of his lawn which he had to mow. He was very particular, for the grass quickly threatened to make its own trim grounds look very much like a wilderness.

He hit upon a brilliant idea. Waving off the ground, he turned down a dozen guinea pigs, which he had bought for the purpose at the grass as evenly and neatly as any mowing machine could have done, much to their master's delight.

Then he hit upon a brilliant idea. Waving off the ground, he turned down a dozen guinea pigs, which he had bought for the purpose at the grass as evenly and neatly as any mowing machine could have done, much to their master's delight.

He hit upon a brilliant idea. Waving off the ground, he turned down a dozen guinea pigs, which he had bought for the purpose at the grass as evenly and neatly as any mowing machine could have done, much to their master's delight.

### The Lights Of 65 Years Ago

Are still doing duty in the same type

Eddy's Matches

Sixty-five years ago the first Canadian-made matches were made at Hull by Eddy and since that time, for materials and striking quality, Eddy's have been the acknowledged best.

When Buying Matches Specify "Eddy's"

No Nutrition in "Straw Bread"

The "uter fertility" of using ground straw bread is suggested by German doctors, has been proved by a severe test made by Dr. J. Zuntz, of the University of Berlin.

His experimental subject was a young woman who was unable to take a meal to exhibit a favorable digestive response to a crude food product. The outcome has been that out of 100 grammes of flour, a cake of straw bread of the same value of not more than 30 calories was made.

There is no reason to doubt that the straw bread is a very poor food, resulting in an actual loss rather than a gain of protein to the body.

"is good tea"

## Local & General

Next Monday, October 9th, is Thanksgiving Day.

J. B. Stewart has been appointed a commissioner.

R. L. Stone left this week to visit friends at Rapid City, Man.

Birth—On September 29th, to Mr. and Mrs. H. Jenkins, a daughter.

Birth—On Wednesday, October 4th, to Mr. and Mrs. L. Farne, a son.

Mrs. Geo. Bedell spent a few days with friends in Medicine Hat this week.

Mrs. H. Grothe returned to Burdett this week from the Bow Island hospital.

T. Roberts living south of Bow Island, from 73 acres obtained 3500 bushels.

Wayne Johnston and J. E. Murphy have each purchased this week a Chevrolet car.

A special Thanksgiving service will be held at the Methodist Church on Sunday evening next.

Mrs. Goldreich and J. N. Gibson each bought a Gerhard-Heintzman piano from the Bedell Furniture Co this week.

The regular annual meeting of the Red Cross Society will be held in the Council Chambers at three o'clock this afternoon.

Mrs. King, accompanied by her daughter Grace, arrived this week from Wasau, Wis., on a visit to her sister, Mrs. C. E. Henry.

Mr. Samuel Breeding, the mine operator at Henry's mine, is desirous of receiving orders immediately for coal. He wishes to remain at the mine continuously from this on.—Advt.

Rev. N. T. Bran, Mrs. Bran, Miss Smith and Mr. Patterson, returned from Bow Island yesterday and are spending the week end with Mrs. D. A. Smith.—Lethbridge Herald.

See our new trussed double-trees, single-trees and neck-yokes. You can't break them. This device does away with the lead covers altogether. Call and see them.—Svensson and Co.—Advt.

Whilst engaged in running an engine last week, Gordon Evans was caught in the fly wheel and whirled round several times before assistance could be rendered. Whilst his clothes were almost all torn off, fortunately no bodily harm resulted.

Ford cars have been purchased during the past week by the following:—M. L. Bowen and W. G. Jordan of Maleb; N. Steenby of Whitla; W. Degg and I. C. Freeman, Winnifred; and H. C. Spring, John E. Ley and C. F. Henry of Bow Island, also Chas. Leigh and P. J. Kenney.

Owing to the heavy snowfall the fair at Etzikom, advertised to take place on October 3rd and 4th, has had to be postponed. This also rendered necessary the cancellation of an excursion train from Lethbridge. The fair, however, it is understood will be held within a week or two.

A "S.O.S." call came from the South country this week. No name was attached, neither was the location revealed, but it is believed the distress signal came from a band of chicken hunters who left Bow Island the early part of the week. Steps are being taken to render all assistance possible.

Sunday, the 15th, is Children's Day in the English Church in Canada. To encourage the children, young folks and friends are invited to All Saints' Church where the Service will be of the nature of a Harvest Thanksgiving. The hour will be 4 p.m. The usual evening service follows at 7.30.

## Threshing Outfits Supplied.

A good supply of **THRESHERS' BLANKETS** on hand from \$3.25 up.

Men's Mackinaws, all prices.  
Men's Overalls, from \$1.25 up.  
Boys' Pants, ages 10 to 15, per pair \$1.50.

**HOAGLIN'S DEPARTMENT STORE**

The casualty list of one of the battles this week contained the name of Sergeant Tjekler of Bow Island as being killed. Can any of our readers furnish us with any information regarding this soldier.

Failing to get one of the oil companies to locate here, R. S. Beattie is starting in the game himself, and as a preliminary step shipped in this week a carload of White Rose gasoline. If he has any more trouble with oil companies, he threatens to put on a drilling crew and get his next supply locally.

## District News

### Maleb.

Who said, "Ice Cream." Surely not again.

Mr. M. L. Bowen has the foundation ready for his new store.

Mr. W. G. Bowen has purchased one of the popular Ford cars.

Mr. W. Sutermeister gave a very appropriate sermon on Sunday last which was enjoyed by every one present.

Notice to New Chauffeurs.—Watch the wheel, and remember there's a ditch, but it's just as well not to run it, for repairs cost money nowadays, such as wheels.

A Bystander.

### Dance at Foremost.

A big dance was given in the Coulter Bank school house, near Foremost, on September 16th in honor of Ed. Matthews, who has donated the Khaki. After supper, Mr. T. M. Westbrock gave a short address and then asked Miss Kathleen Hayley to present Mr. Matthews with a wrist watch. After all expenses were paid, it was moved by A. E. Barnes, seconded by Mr. Westbrock that the balance \$5.00 be sent to Mr. Colton as a donation towards the Khaki fund.

It is with considerable pleasure that the "Review" accedes to the request of its correspondent, and in accordance with the desire expressed the amount has been sent, through the Bank of B.N.A., to the Overseas Tobacco Fund.]

## A Car For You

Is waiting at our Garage in Bow Island. The "OVERLAND," as you know, has a reputation that is equalled by no other. Call around and see us and let us demonstrate this car.
